**TO FEED IN CARSON VALLEY**

This week the Mott company drove several large bands of cattle in from the mountain ranges in Mono county to be fed in this valley. Ordinarily this stock is fed on the company's large holding in Antelope valley, but a disease or infection exists there that has brought great loss of stock. The disease is not contagious but comes from the grass or water in the Antelope valley.—Record-Courier.

**MANHATTAN PLACERS PRODUCE MUCH GOLD****GOOD RUN RECENTLY MADE FROM ORE FROM TOP OF MUSTANG HILL**

"There is a great deal of mining going on in Manhattan until at present," said W. E. Johnson, postmaster at the pine-tree camp, this morning before returning to the diggings. "In fact there are more placer miners at work than there have been for the past seven or eight years. The leaders say they are simply prospecting, but they are certainly making good, and I should know, for nearly all the shipments of dust and nuggets are being made through the United States mail. Preparations are evidently being made for going after a big production next spring."

An English syndicate is coming prepared to do heavy work. Its entrance into the camp will be due to the excellent work of T. K. Muir, who is now operating the Little Grey mine. The White Caps company is getting ready for work, although some delay has been occasioned by the failure of delinquents to come through on the assessment. They have been given further time.

The Wittenberg-Machett mill is running steadily, as it also the custom mill up the canyon. The latter recently completed a run for Percy Train and Sam Chase. Sixteen tons that they took from the top of Mustang Hill ran \$1200 and would have gone still higher, only they had to mix the tail with low grade quartz in order to secure treatment without heavy loss, owing to the heavy superabundance of talc. This run was obtained from the end of the glory hole that was opened by the Thanksgiving intervals. Messrs. Whitman and Kase are operating their custom mill. Mr. Train left this morning for Challenge, California, where he recently purchased a ranch and where his family resides.

**CASH BOY REPORTS THREE FACES IN ORE****MANAGER MEADE PLEASED WITH WORK THAT WAS DONE DURING HIS ABSENCE**

Manager Meade of the Cash Boy reports both raises from the 1450 level of the Cash Boy in mill ore across the fall faces this morning. The entire cutting is sweetened by six inches of 140 grade. The west drift on the 1450 is also showing values similar to those in the raises.
